

Science Communicator, Research Communication Services

This is an exciting new role at CACTUS, a top science communication agency working with universities, publishers, and researchers globally. Research Communication is a fast-growing portfolio of solutions that increases the impact of scientific research through non-traditional content formats.

You will help serve the evolving science communication needs of scholarly publishers, academic societies, research institutions, science outreach organizations, and researchers by working with a team of writers, editors, graphic designers, and animators to tell science stories across content formats and styles.

What does the job entail?

- Working with a team of science writers and designers to break down scientific content into easy-to-understand and engaging material in visual, oral, and audio-visual formats
- Consulting with editorial offices and communications departments of customers to deliver as per objectives
- Building campaign strategy plans based on customer briefs and requirements
- Executing distribution plans for customers to achieve targeted visibility, media coverage, and/or audience engagement
- Communicating effectively with resources across functions with the objective of delivering projects against set timelines

Requirements

- Must either hold a degree in science communication, scientific journalism, science media production, public engagement, or similar programs, with professional experience highly preferred, OR must have previous experience in any of a wide range of professional science communication careers with media and science organizations, including creative agencies working in spaces adjacent to science media, such as healthcare communications.
- Must be self-motivated, have excellent organizational, time management, and communication skills (written and verbal), and be flexible.

Job location: Mumbai

CTC : 4.5 to 6 lacs per annum (Negotiable)

To apply: E-mail your updated resume to tejal.dsouza@cactusglobal.com.

CACTUS

Company Profile

Founded in 2002, Cactus Communications is a fully integrated, global scholarly communications company with offices in Japan, South Korea, India, China, Singapore, United Kingdom and the United States as well as local representatives in Taiwan & Brazil. Employing a global workforce of over 750, CACTUS has served 281,000+ authors and has edited 914,800+ papers across 1,200 disciplines to date. Our specialized expertise enables our clients to overcome language, market, cost, and resource barriers, allowing them to achieve their communication goals and to accelerate the development of global science. CACTUS has one of the largest teams of editors, trainers, and publication support experts in the world, with more than 2,000 professional editors, PhDs, and postdocs, and 106 BELS-certified editors.

CACTUS collaborates with journals, publishers, universities, and societies to provide editorial services to their authors, and to assist these institutions with customized pre-production support, including pre-peer review screening, language polishing, transcription, translation, and advisory services. CACTUS strives to serve the growing need for transparency and research integrity in the academic and scientific communities, and to promote the free flow of information among researchers, worldwide.

CACTUS acts as a trusted advisor by consistently delivering excellence that goes way beyond just technical expertise. Teams at CACTUS work as an extension of client teams and provide them with flexible and innovative solutions that allow them to manage their budget wisely and do more with less while maintaining high levels of quality and data integrity.
